## **Amendments to the Claims**

This listing of claims will replace all prior versions and listings of claims in the application.

## **Listing of Claims**

- 1-22. (canceled)
- 23. (currently amended) A medical device, comprising:
- a <u>solid</u> linear elastic member having at least one localized area of flexibility formed by selectively heating an intermediate portion of the member to a temperature sufficient to induce superelasticity in the member.
- 24. (original) The medical device of claim 23, wherein the linear elastic member defines a wire loop.
- 25. (original) The medical device of claim 23, wherein the linear elastic member defines a filter leg.
- 26. (original) The medical device of claim 23, wherein the linear elastic member defines a stent.
- 27. (original) The medical device of claim 23, wherein the linear elastic member defines a core wire.
  - 28. (currently amended) A medical device comprising:
  - a solid linear elastic member having a localized superelastic region;

wherein the localized superelastic region is formed by heating an intermediate portion of the <u>solid</u> linear elastic member to a temperature sufficient to form the localized superelastic region within the linear elastic member.

- 29. (previously presented) The medical device of claim 28, wherein the linear elastic member has only one localized superelastic region.
- 30. (previously presented) The medical device of claim 28, wherein the localized superelastic region comprises an articulation region.
- 31. (previously presented) The medical device of claim 28, wherein the localized superelastic region is formed by heating to a temperature that is at least as high as a final austenitic temperature of a material forming the linear elastic member.
- 32. (previously presented) The medical device of claim 28, wherein the linear elastic member is formed of a linear elastic nickel-titanium alloy and the localized superelastic region comprises, after the heating step, a superelastic nickel-titanium alloy.
- 33. (previously presented) The medical device of claim 28, wherein the linear elastic member defines a wire loop.
- 34. (previously presented) The medical device of claim 28, wherein the linear elastic member defines a filter leg.
- 35. (previously presented) The medical device of claim 28, wherein the linear elastic member defines a stent.
- 36. (previously presented) The medical device of claim 28, wherein the linear elastic member defines a core wire.
